PROFESSIONAL SUMMARY

Strategic **Data Science & GenAI Engineer** with **7.5+ years** of diagnosing business constraints, identifying high-impact opportunities, and engineering production-grade AI platforms – from conceiving the idea to leading the team to shipping the solution. Expert in **Agentic AI, RAG, LLM, and multi-modal architectures**, deployed on cloud infrastructure. Track record of leading teams, scaling platforms to **1,500+ enterprise users** – delivering **20–50% efficiency gains** across compliance, development, and data operations.

TECHNICAL SKILLS

- **Generative AI & LLMs:** Agentic AI (AutoGen, CrewAI), RAG, LangChain, LangGraph, Hugging Face, Prompt Engineering, Multi-modal/Vision LLMs (OpenAI, Claude, Llama, Gemma etc.), Ollama, Vector DBs (Milvus, FAISS, Qdrant, Azure Cosmos DB), MCP, A2A, Multi-agent Architectures .
- **ML & Analytics:** Predictive/Statistical Modelling, NLP, Recommendation Systems, Churn Prediction, Financial Modelling.
- **Cloud & MLOps:** AWS, Azure, **Red Hat OpenShift**, Docker, GitLab CI/CD, Kubernetes, Redis.
- **Data Engineering:** Snowflake, AWS Redshift, MySQL, MongoDB, DBT, Apache Airflow, Meltano, ETL/ELT, Salesforce, Oracle DB.
- **Languages & Tools:** Python (FastAPI, Flask, Pandas), SQL, R, Git, Tableau, Power BI, Dataiku, KNIME, n8n.
- **Leadership:** Technical Roadmapping, Agile/Scrum, JIRA Project Management, Mentoring & Hiring, Stakeholder Management, Executive Pitching.

PROFESSIONAL EXPERIENCE

Infineon Technologies Pvt. Ltd.
Sr. Staff Engineer, Data Science

Bangalore, India
Jul 2025 – Present

- Spearheaded **Hivemind**, within 4 months scaled to **1,500+ users** (100+ DAU) by architecting a centralized knowledge portal for documentation with LLM solution on **Red Hat OpenShift**, reducing documentation time by **35%**.
- Diagnosed org-wide code duplication as a critical productivity gap; pioneered **PRIMO** – an internal developer platform now in beta adoption – projected **30-40% reduction** in redundant effort.
- Founded and led **VIZARD**, a 4-engineer hackathon team delivering an NLP + RAG dashboard recommender across **2,000+ Tableau assets**. Achieving accuracy of **63.73%** in 1 day hackathon.
- Mentored 3-4 engineers, delivered workshops on RAG and Copilot; drove campus and replacement hiring, successfully placing **3 technical candidates**.
- Mentoring interns on end-to-end **order demand forecasting** using ML; guiding data cleaning, transformation, and feature engineering to ensure production-ready model inputs.
- Managing division-wide **GitLab workspace** across **50+ projects**; identified code quality gaps, authored developer guidelines, and proposed an **in-house automated code quality tool** to enforce standards at scale.

Emorphis Technologies Pvt Ltd
Lead Data Analyst

Remote
May 2023 – Jun 2025

- Diagnosed fragmented advisor workflows and compliance bottlenecks; built **RAG + LLM** chatbots (Gemma, DeepSeek) delivering **15% faster FINRA processing** and **30% lower** customer response latency.
- Ideated & built **M365 copilot Agent** advisor onboarding platform, reducing onboarding time by **20%**.
- Led a **4-person team** to architect and consolidate acquisition data in DWH on Salesforce, Oracle DB, and SQL consolidating **30M+ rows**, cutting migration downtime from **6 hrs to under 2 hrs**.
- Developed **Vision LLM OCR** pipeline for complex financial documents, reducing advisor onboarding time by **20%** through optimized embeddings and chunking strategies.

Reddoorz
Sr. Data Analyst

Noida, India
Jan 2021 – Apr 2023

- Built property recommendation model (85% accuracy) driving a **12% occupancy increase**; processed **10,000–20,000 daily transactions** to power real-time recommendations.
- Engineered churn prediction and recommendation systems with **90%+ retention forecasting accuracy**.
- Optimized ETL pipelines (Meltano/DBT/Airflow) and data quality monitoring, achieving **50% lower data latency** and **25–40% reliability improvement**.

Freelance Data Scientist
ML Researcher & Developer

Galway, Ireland
Jan 2020 – Dec 2020

- Delivered ML research across sports analytics and NLP domains alongside MSc studies, resulting in **2 peer-reviewed publications** at LREC 2020 and ICACCS 2020.

Ongraph Technologies
Software Developer

Jaipur, India
Jan 2017 – Jun 2018

- Designed and delivered RESTful APIs, backend microservices, and early-stage ML models for client web and mobile products using Ruby on Rails and JavaScript.

KEY PROJECTS

- **Hivemind (Enterprise knowledge Platform) | Infineon Technologies**
 - **Architected and led** end-to-end deployment of a centralized LLM platform – enabling **25+** teams to document, version, and standardize all processes in one place.
 - Engineered production infrastructure with **GitLab CI/CD**, **Redis caching**, and query optimization achieving **15% faster response times**; integrated **SSO auth**, **Confluence** and **JIRA plugins** – platform grew to **1,500+ users** and **100 daily active users**, making it one of Infineon’s most widely adopted internal AI tools.
- **PRIMO (Developer Community Platform) | Infineon Technologies**
 - Diagnosed org-wide code duplication in GitLab repos as a recurring development bottleneck; **self-initiated, architected, and shipped** a web app centralizing reusable Infineon code modules with **n8n webhook-powered chat Q&A** and **6 structured documentation guides**.
 - Grew from PoC to **beta-stage platform** with active team adoption; roadmapping a **LangGraph Agentic AI layer** to recommend Infineon-approved tech stacks and auto-generate project scaffolds – projected **20–30% reduction** in redundant development effort.
- **VIZARD (AI Dashboard Recommender) | Infineon Technologies**
 - Diagnosed analytics fragmentation across **2,000+ Tableau assets**; architected an automated pipeline – server extraction, cleaning, **LLM summaries**, and **ML auto-tagging** into database –powering a hybrid **NLP + RAG** recommender for intelligent dashboard discovery.
 - In POC achieved **63.73% tagging accuracy** with full automation – reducing time-to-insight for analysts and cutting redundant dashboard requests across the organization.
- **Client Acquisition Data Migration & Warehouse Integration | Emorphis Technologies**
 - **Designed and executed** a **strategic** data warehouse integration for acquired entities, consolidating disparate data sources while maintaining rigorous QA standards, resulting in **no critical data loss**.
 - Spearheaded end-to-end data migrations for **multiple acquisitions** by orchestrating vendor activities and managing complex stakeholder requirements, ensuring seamless transitions with no significant downtime and mitigating operational risks.

EDUCATION

Master of Computer Science (Data Analytics)
BTech in Information Technology

NUIG, Galway, Ireland(2018 – 2019)
Manipal University, Jaipur (2013 – 2017)

RESEARCH & PUBLICATIONS

- *Tamil Memes Classification Dataset*, ICACCS 2020.
- *Unsupervised Methods to Analyze EPL Football Team Playing Style*, LREC 2020.
